

MODULAR RACKS –

Fully welded, heavy duty system. The rack includes an aerofoil, significantly reducing wind

noise and drag. It also includes a roller system to ease loading and unloading.

All racks enable the transportation of 8' x 4' boards.

DELTA BARS AND ROLLER -

The Delta Bar System combines the benefits of a modern aerodynamic profile shape to reduce drag and wind noise.

The system offers superb strength and versatility with an array of optional extras. Please contact us to discuss your needs.

REAR DOOR LADDERS –

Designed with user friendly rounded hand rails and anti slip tread plates.

PIPE TUBE -

The Pipe Tube incorporates strength, style and security to provide the best method of transporting pipe and conduit.

The Pipe Tube is able to transport 50 15mm copper tubes
